AI-enabled Product Manager and Agile Product Owner with 11+ years of experience leading digital product delivery across FinTech, HealthTech, InsurTech, Compliance, and Real Estate technology. I specialize in turning customer needs, business goals, and technical requirements into clear product strategies, PRDs, roadmaps, user stories, and execution plans that engineering teams can deliver with confidence. My background combines product ownership, Agile delivery, Scrum leadership, stakeholder management, and cross-functional collaboration with UX, Engineering, QA, Data, Legal, and Customer Success teams. I also leverage AI-enhanced workflows using tools such as Open AI, Claude, Claude CoWork, Obsidian, Figma AI, and automation-assisted documentation to accelerate product discovery, backlog quality, requirements analysis, build validation, competitive research, and team alignment. My focus is simple: create useful digital experiences, reduce ambiguity for teams, and deliver measurable product impact through strong execution, clear communication, and modern AI-enabled product practices. Top Skills: Product Management, Agile Product Ownership, Scrum, SAFe, Jira, Confluence, PRDs, Roadmaps, User Stories, AI-enhanced Product Workflows, Claude, Obsidian, Figma, Open AI Stakeholder Management, Software Development Lifecycle, API Integrations, Data-informed Decision Making, Cross-functional Leadership, FinTech, HealthTech, InsurTech.

Experiencia

Plan A Technologies

Sr. Product Manager

marzo de 2026 - Present (3 meses)

As a Senior Product Manager at Plan A Technologies, I support Compass, the largest residential real estate brokerage in the U.S. by sales volume, leading

product management for mobile and web experiences across agent-facing workflows.

- Own PRDs, user stories, acceptance criteria, and backlog refinement for mobile features, turning ambiguous client needs into clear, release-ready scope.
- Partner with Product, Engineering, UX, QA, and Analytics to translate iOS and web behavior into Android-ready requirements for Homepage, Collections, Search, and related agent journeys.
- Drive cross-platform parity initiatives by identifying gaps, documenting expected behavior, edge cases, dependencies, analytics, and launch considerations.
- Own sprint planning, refinement, reviews, and cross-team coordination across distributed pods delivering mobile product initiatives.
- Collaborate with UX and Engineering to validate Figma flows, native components, navigation patterns, empty states, error states, and key user interactions.
- Use AI-assisted workflows to strengthen documentation quality, reduce ambiguity, and accelerate backlog preparation.

Key Contributions

- Built structured PRDs and Jira-ready stories for Homepage and Collections initiatives, improving alignment across Product, Design, and Engineering.
- Established repeatable workflows for parity reviews, requirement validation, open-question tracking, and refinement-ready documentation.

Personify Health

Technical Project Manager - AI-Driven Product Execution & Agile Delivery

abril de 2024 - marzo de 2026 (2 años)

Estados Unidos

Led product ownership and Agile delivery for digital health and benefits experiences, translating business, compliance, and user needs into clear product requirements, scalable backlog structures, and cross-functional execution plans.

- Defined product scope, user stories, acceptance criteria, and release-ready requirements in Jira and Confluence, managing the full Agile lifecycle across PI Planning, sprint planning, daily standups, backlog grooming, reviews, and retrospectives.

- Partnered with Engineering, UI/UX, QA, Legal, Data, and Customer Success to deliver compliant, high-quality modules across My Coverage, Claims, MCC, and member-facing health and benefits experiences.
- Translated complex business, compliance, and technical requirements into clear documentation, user flows, and backlog items that reduced ambiguity for engineering teams.
- Led onboarding and mentorship for new team members and Product Owners, helping standardize product practices, documentation quality, and Agile ways of working.
- Collaborated with CTO and VP-level leadership on roadmap planning, prioritization, dependency management, and cross-team alignment.

Key Achievements

- Delivered 4 high-impact product modules with 90%+ sprint goal completion.
- Reduced backlog churn by 30% through structured grooming, clearer acceptance criteria, improved dependency tracking, and prioritization frameworks.
- Improved product iteration cycles by capturing user insights, identifying edge cases, and translating feedback into actionable product enhancements.

AI-Assisted Product Acceleration

- Used Claude, Claude CoWork, Obsidian, and Figma AI to accelerate PRDs, user-story creation, acceptance criteria, Confluence specs, and backlog refinement.
- Implemented AI-supported workflows to validate logic flows, detect UI/UX inconsistencies, surface edge cases earlier, and improve sprint readiness for design and engineering teams.

Drata

Sr. Agile Product Owner

noviembre de 2022 - abril de 2024 (1 año 6 meses)

California, Estados Unidos

Owned Agile product execution for compliance software integrations, partnering with Engineering, Architecture, UI/UX, Customer Support, and client-facing teams to deliver scalable product capabilities.

- Led Scrum ceremonies including sprint planning, daily standups, backlog refinement, reviews, and retrospectives.
- Managed Jira backlog health, prioritization, user stories, and acceptance criteria to improve team focus and delivery readiness.

- Supported compliance software integrations with platforms such as Confluence, Intune, AWS, and Azure.
- Partnered with cross-functional teams to clarify requirements, resolve dependencies, and align product scope with technical feasibility.
- Conducted sprint demos and feedback sessions to validate completed work and identify product improvements.
- Served in a hybrid Product Owner and Scrum Master capacity, supporting both product execution and Agile team health.

EasyPay Finance

Solutions Product Manager

julio de 2021 - noviembre de 2022 (1 año 5 meses)

California, Estados Unidos

Led end-to-end product delivery for EasyPay's first mobile app, built in React Native across iOS, Android, and web experiences.

- Owned the product lifecycle across discovery, requirements, backlog prioritization, user stories, Agile ceremonies, QA alignment, and release support.
- Partnered with Engineering, UI/UX, QA, Marketing, and Product teams to launch core mobile payment capabilities.
- Delivered features including recurring payments, automated alerts, in-app account blocking, balance visibility, payment due dates, and personalized loan offers.
- Supported AI-powered OCR functionality to extract card data from camera scans and identify card types such as Visa and Mastercard.
- Led API integrations with financial institutions and payment platforms to support secure and scalable payment transactions.
- Analyzed usage metrics and platform behavior to identify product improvements and enhance the mobile experience.

Omnitracs

Sr. Product Owner

marzo de 2020 - julio de 2021 (1 año 5 meses)

México

Managed product requirements and Agile execution for transportation and fleet technology products, working directly with Engineering Leads, Program Managers, and Product Managers.

- Owned product requirements, backlog prioritization, and feature enhancements across assigned product areas.
- Led product and technical analysis to clarify user needs, business value, and development scope.
- Partnered with engineering teams to support planning, backlog grooming, sprint reviews, and product delivery.
- Researched competitive market trends to identify opportunities for product improvement and differentiation.
- Represented the product team in cross-functional meetings, aligning stakeholders on scope, priorities, and delivery risks.
- Ensured development work followed product requirements and engineering best practices.

Cisco

Product Manager CISCO Collaboration Architecture

julio de 2018 - abril de 2020 (1 año 10 meses)

Ciudad de México

Managed growth initiatives for Cisco Collaboration Architecture, including Cisco Webex, by coordinating product strategy, partner engagement, sales enablement, and go-to-market activities.

- Collaborated with Cisco, business partners, sales, marketing, engineering, finance, operations, and warehouse teams to drive product line growth.
- Developed quarterly product growth plans and tracked execution against sales and market objectives.
- Managed vendor relationships, partner funding, architecture events, and demand-generation programs.
- Supported sales teams with product positioning, training, pre-sales coordination, and complementary solution recommendations.
- Monitored inventory alignment, discounts, promotions, and segment-based business performance.
- Represented Comstor and Cisco in events and architecture sessions, serving as a product and solutions speaker.

Telmex

Product Manager desarrollo empresarial TELMEX

enero de 2016 - abril de 2018 (2 años 4 meses)

México

Led research, benchmarking, and internal product analysis for TELMEX business, residential, and SMB service offerings.

- Directed research activities across three TELMEX laboratories in collaboration with Kantar TNS, On Target, and TELMEX IT.
- Monitored competitor offerings across pricing, technology, software, hardware, and service positioning.
- Created executive presentations and product insights for internal TELMEX clients, product architects, and commercial teams.
- Participated in IT events to report market trends, competitor movements, and emerging technology opportunities.
- Provided internal consultancy for product launches, offer changes, and competitive response strategies.
- Identified risks of customer loss and recommended equivalent or superior solutions to protect market position.

Traffilog LTD

IT Technical Manager

febrero de 2014 - enero de 2016 (2 años)

México

Managed the technical department personnel, leading a team of 24 individuals with diverse support levels (Tier 1, Tier 2, Tier 3), providing support to clients and remote installers, offering training for VIP clients and new staff, and overseeing all in-house support for the systems department.

-Monitored devices connected to various types of vehicles.

-Coded in assembly language to configure or reconfigure equipment remotely.

-Updated firmware both locally and remotely.

-Led in-house project development for new versions of devices (MBU or ITU).

-Provided real-time support to installers, clients, and monitors at Tier 1, Tier 2, Tier 3, and the call center.

-Conducted bi-monthly maintenance on computer equipment, addressing both physical and software aspects across different operating systems.

-Acted as a bridge with various managers in commercial, marketing, operations, and general management areas, coordinating installations, updates, and uninstallations, along with external hiring and quotations.
